Erasmus+

HOW DOES THE APPLICATION HELP PREVENT FOOD WASTE?

- ▶ It prevents disposal of food that is still good
- ▶ Lot of people have access to it
- ▶ It is cheaper
- ▶ It is a simple way for people to buy it
- ▶ We have a lot of options

"EXPERIENCES" ABOUT GETTING DINNER

- ▶ We got food and explored the city
- ▶ It was fast
- ▶ The app needs to be improved
- ▶ The food was cold
- ▶ The price was good
- ▶ It is bad/good that we get a surprise
- ▶ Not enough options for people with specific diets

In my opinion it was much fun because we had some fun chats and we've had dinner and we've seen many nice places in Budapest

Manuel:

I agree with the concept, this alternative can raise awareness among consumers in their daily lives but I find that this application is not widespread enough

Flavie

It's good to avoid food waste but it is upgradable because most of the food was cold and not for people with specific diets

Tamara

It is a good app because you don't have to throw away food

Saranda

I think it's a good app because less food is thrown away

Mariele

I think this is a good thing, the price is correct

Nicolas

It is good app but we should know our options, vegan etc... but it is a good way for restaurants to not waste

Nicolás

Same as Nicolás. I didn't like the food because it was cold.

Malena

THANK YOU FOR YOUR ATTENTION!
